

STORAGE AND DISPOSAL

(10L, 20L & 200L only)

Keep out of reach of children. Store in the closed, original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Triple or preferably rinse containers before disposal. Add rinsing to spray tank. **DO NOT** dispose of undiluted chemicals on-site. If not recycling, break, crush, or puncture and bury empty containers in local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

Envirodrum 110L Mini Bulk Returnable Container

Store the original sealed Envirodrum in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. **DO NOT** tamper with the Micro Matic valve or the security seal. **DO NOT** contaminate the Envirodrum with water or any foreign matter. After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Imtrade Australia Pty Ltd.

Refillable Containers (1000 only)

Store in the closed original container in a cool well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of sale for refill or storage.

SAFETY DIRECTIONS

Avoid all eye and skin contact. Wear rubber/PVC gloves, goggles and overalls.

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

IMTRADE PENETRATE WETTER

ACTIVE CONSTITUENT:
1000 g/L ALCOHOL ALKOXYLATE

Biodegradable wetting and spreading agent. A spray activator for use with knockdown and residual herbicides. Non-flammable, low toxicity.

IMPORTANT: READ THE ATTACHED LEAFLET BEFORE OPENING OR USING THIS PRODUCT.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 131 126). Remove from contaminated area and keep at rest until fully recovered. If skin contact occurs, remove any contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

DIRECTIONS FOR USE

Situation	State	Application Rate	Critical Comments
General weedkilling sprays High vol. Power spray Low vol. Boom spray Misting machines Knapsacks	All States	10 mL/100L 40 mL/100L 5 mL/5L 2 mL/15L	
Reglone, High vol. Power spray, Boom spray Knapsack	All States	120 mL/100L 120 mL/100L 20 mL/15L	For maximum efficiency of this herbicide, a higher rate of Imtrade Penetrate Wetter must be used to ensure even and thorough coverage of plant foliage and to increase absorption. This is particularly important for killing grasses and tall, dense vegetation.
Paraquat 250 Spraykill 250	All States	60 mL/100L 120 mL/100L	These formulations contain wetting agents and Imtrade Penetrate Wetter is only required if dilution rates are excessive, i.e. low chemical rates and high water rates per ha. Consult product labels before using.
Diquat 200	All States	200 mL/100L	If volume of water applied when using 3 – 4L Diquat 200 exceeds 200L/ha.
		100 mL/100L	When using Diquat 200 at 300 – 400 mL/100L.
Fusilade*	All States	200 mL/100L	Use this rate unless otherwise specified on the Fusilade* label.
		120 mL/100L	Some vegetables and ornamentals.

DIRECTIONS FOR USE continued

Situation	State	Application Rate	Critical Comments
Diclofop-Methyl	WA only	250 mL/100L	Use Imtrade Penetrate Wetter at 250 mL when mixing Diclofop-Methyl with Homyx*, Tigrex* or MCPA LVE. DO NOT add Imtrade Penetrate Wetter with mixtures of Diclofop-Methyl and Linuron, Bromoxynil or Methabenzthiazuron.
Soil Residual Herbicides e.g. Diuron 900 WG, Atrazine 900 WG	All States	100-400 mL/100L	When applying soil active herbicides such as Diuron 900 WG or Atrazine 900 WG to standing weeds, add Imtrade Penetrate Wetter to thoroughly wet foliage. Consult product labels for individual recommendations.
Fire Fighting, Water Tanker, Knapsack	All States	5 mL/100L 2 mL/15L	In this field, Imtrade Penetrate Wetter has the advantages of less weight to carry compared with less concentrated surfactants and of being non-flammable. It increases the wetting power of water, which assists in quick control and mopping up of fires. It is of particular value where water may not be readily available as a less drenching spray is needed and a thankful will cover a bigger area.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Imtrade Penetrate Wetter is a biodegradable spray additive containing 100% w/v non-ionic surfactant and is suitable for use with all types of weed killers. It increases herbicide activity by better wetting and absorption and improved spray coverage. Imtrade Penetrate Wetter can be used with both acid and alkaline sprays and mixes easily with all types of water.

Weedkilling Sprays

Imtrade Penetrate Wetter should be added to all herbicide sprays to increase their efficiency except those, which are known to contain adequate wetting agent in the formulation. Wetter should be added only where directed on individual labels, as use with selective herbicides outside label directions may reduce crop selectivity. For foliar active herbicides, spray to the point where the leaves and stems are just wet. Spraying beyond this encourages runoff and subsequent loss of spray chemicals. In general, use a high volume spray for soil residual herbicides. When spraying waxy or hairy leafed plants, which are normally hard to wet, increased activity will be obtained by increasing the rate of Imtrade Penetrate Wetter. It is important that the leaves and stems are thoroughly wetted for foliar herbicides to work effectively particularly when treating dense tall vegetation.

Mixing

Imtrade Penetrate Wetter mixes easily and quickly with water and should be added direct to the spray tank. It should not be added direct to undiluted sprays containing wetting agents.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT TOXIC TO FISH.

Although rapidly biodegradable, contamination of streams, rivers or waterways should be avoided.

STORAGE AND DISPOSAL (1L, 5L, 10L, 20L & 200L only)

Keep out of reach of children. Store in the closed, original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Triple or preferably rinse containers before disposal. Add rinsing to spray tank. **DO NOT** dispose of undiluted chemicals on-site. If not recycling, break, crush, or puncture and bury empty containers in local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

Envirodrum 110L Mini Bulk Returnable Container

Store the original sealed Envirodrum in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. **DO NOT** tamper with the Micro Matic valve or the security seal. **DO NOT** contaminate the Envirodrum with water or any foreign matter. After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Imtrade Australia Pty Ltd

Refillable Containers (1000 only)

Store in the closed original container in a cool well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of sale for refill or storage.

SAFETY DIRECTIONS

Avoid all eye and skin contact. Wear rubber/PVC gloves, goggles and overalls.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 131 126). Remove from contaminated area and keep at rest until fully recovered. If skin contact occurs, remove any contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.
