

GENERAL INSTRUCTIONS

RESISTANT WEEDS WARNING

GROUP **B** HERBICIDE

Imtrade Amaze 700 WG Herbicide is a member of the Imidazolinone group of herbicides. Imtrade Amaze 700 WG Herbicide has the inhibition of Acetolactate synthase (ALS) mode of action. For weed resistance management, Imtrade Amaze 700 WG Herbicide is a Group B Herbicide. Some naturally occurring weed biotypes resistant to Imazethapyr and other Group B Herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These weeds will not be controlled by Imazethapyr or other Group B Herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Imtrade Australia Pty Ltd accepts no liability for any losses that may result from failure of Imtrade Amaze 700 WG Herbicide to control resistant weeds.

STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. **DO NOT** dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should **NOT** be burnt.
