

STORAGE AND DISPOSAL

Store in the closed original container in a cool, well ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Break, crush, puncture and bury empty containers and dispose of unused bait in an approved waste management facility. If an approved waste management facility is not available, bury the containers or unused bait below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots in compliance with relevant Local, State or Territory government regulations. **DO NOT** burn empty containers or product. **DO NOT** use containers which have held bait for any other purpose.

Dispose of carcasses safely by burning or burying in an approved landfill.

SAFETY DIRECTIONS

Poisonous if swallowed. **DO NOT** inhale dust. **DO NOT** touch bait. Use scoop or measure. If on skin and after each baiting, wash thoroughly with soap and water. Wash hands after use.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 13 1126). Vitamin K₁ (Phytomenadione) is antidotal.

NOTE TO PHYSICIANS AND VETERINARIANS

Brodifacoum, the active constituent of Imtrade Top Cat Rodenticide Wax Blocks, is a long lasting anticoagulant chemical, which if ingested by humans, domestic animals or pets, can reduce the clotting power of the blood and haemorrhage, may result. Vitamin K₁ (Phytomenadione) should be administered urgently by medical, appropriate para-medical personnel or veterinarians. If administered intravenously the injection must be given slowly.

DIRECTIONS FOR USE

RESTRAINTS

DO NOT exceed 3m between bait stations for mice or 9m for rats.

DO NOT apply bait to crops.

DO NOT place bait in exposed areas.

Crops	Pests	Rate	Critical Comments
In and around Agricultural, Commercial, Domestic, and Industrial Buildings	Rats (<i>Rattus rattus</i> , <i>Rattus norvegicus</i>), Mice (<i>Mus musculus</i>)	1 to 3 blocks per bait station depending on level of infestation	Set out baits in places frequented by mice and rats but not more than 2m away from buildings. For Rats: Place 1 to 3 blocks at intervals of 5 to 9m in infested areas. For Mice: Place single blocks at 2 to 3m intervals in infested areas.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

THE USE OF THIS PRODUCT FOR THE CONTROL OF PROTECTED NATIVE RODENTS REQUIRES PERMISSION FROM WILDLIFE AUTHORITIES.

GENERAL INSTRUCTIONS

Imtrade Top Cat Rodenticide Wax Blocks can be used both indoors and outdoors. It is recommended that clearly marked tamper evident stations be used wherever baits are to be placed. **DO NOT** place bait on or near exposed food or food utensils, food preparation areas or food storage areas.

Baiting Strategy: Eliminate as far as practical, all other food sources. Bait the infested area. Place baits under cover. Inspect baits daily. Replace eaten baits. If quickly eaten, increase number of baits. Continue observation and replenish until no more baits are taken. Baiting for at least two weeks is necessary to reduce rat/mouse numbers.

Locate bait stations along walls or rafters and in dark sheltered spots where there are signs of rodent activity. Nail or fix in place if relevant. Wax blocks are particularly suitable for use in damp situations where risk of contamination should be minimised. Record the number and locations of bait stations for purpose of replenishment and later removal. Look for dead rats or mice burn or bury them, **DO NOT** place in refuse bins. Inspect all bait stations regularly and ensure baits are removed when rodent activity has ceased.

Most rodent deaths occur 4 to 7 days after consumption of bait.

PRECAUTION

Avoid contact with food, food utensils, or places where food is prepared or stored. The bait is hazardous to pigs, cats, dogs, poultry, birds and other wildlife. Place baits in locations inaccessible to other animals or birds.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the bait or used container. Place baits in locations inaccessible to animals other than target animals. The product is restricted to use in and around buildings (within 2 metres), structures or enclosed spaces, e.g. drains.

STORAGE AND DISPOSAL

Store in the closed original container in a cool, well-ventilated area. **DO NOT** store for prolonged periods in direct sunlight. Break, crush, puncture and bury empty containers and dispose of unused bait in an approved waste management facility. If an approved waste management facility is not available, bury the containers or unused bait below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots in compliance with relevant Local, State or Territory government regulations. **DO NOT** burn empty containers or product. **DO NOT** use containers which have held bait for any other purpose.

Dispose of carcasses safely by burning or burying in an approved landfill.

SAFETY DIRECTIONS

Poisonous if swallowed. **DO NOT** inhale dust. **DO NOT** touch bait. Use scoop or measure. If on skin and after each baiting, wash thoroughly with soap and water. Wash hands after use.
