

# GUERRILLA® HERBICIDE

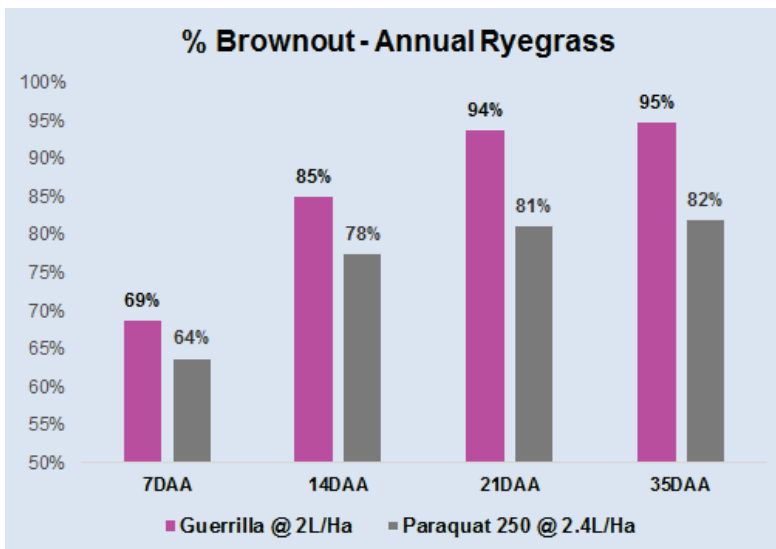

**Key Fit: Aid to cultivation, targeting annual grasses and weeds**

**Figure 1:** Comparative efficacy of Imtrade Guerrilla® 300 v Gramoxone 360 at 83% gram for gram rates on glyphosate resistant annual ryegrass, assessed by percentage control at third party field trial in North East Victoria, June 2021.

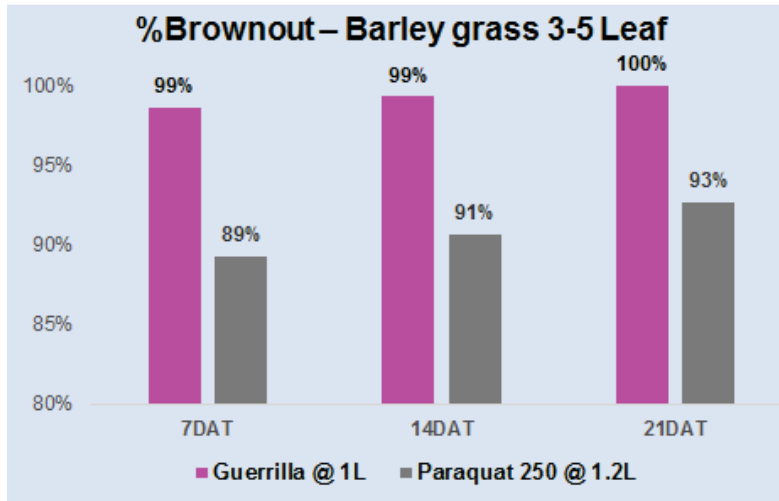

**Figure 2:** Comparative efficacy of Imtrade Guerrilla® v paraquat 250 at equivalent gram for gram rates on volunteer canola (brassica napus) at 3 leaf, assessed by percentage brownout at Imtrade field trial, MDD 344, in Newdegate WA, April 2023.

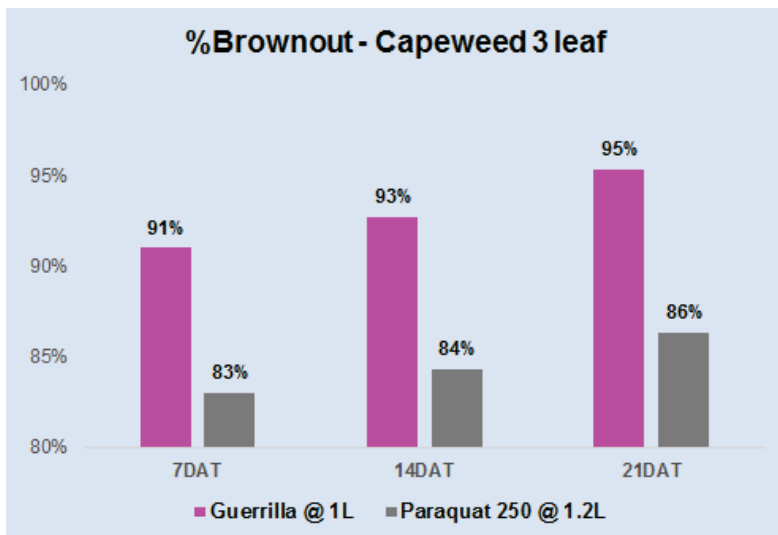

**Figure 3:** Comparative efficacy of Imtrade Guerrilla® v paraquat 250 at equivalent gram for gram rates on glyphosate resistant annual ryegrass, assessed by percentage brownout at third party field trial in Serpentine, North West Victoria, June 2021.

# IMTRADE Guerrilla®

## Herbicide

**Figure 4:** Comparative efficacy of Imtrade Guerrilla® v paraquat 250 at equivalent gram for gram rates on barley grass (*hordeum leporinum*) at 3-5 leaf, assessed by percentage brownout at Imtrade field trial, MDD 346, in Newdegate, WA, April 2023.

**Figure 5:** Comparative efficacy of Imtrade Guerrilla® v paraquat 250 at equivalent gram for gram rates on capeweed (*arctotheca calendula*) at 3 leaf, assessed by percentage brownout at Imtrade field trial, MDD 346, in Newdegate, WA, April 2023.

### CONCLUSION:

The trial results clearly demonstrate the superior performance of Imtrade Guerrilla® over standard paraquat formulations on a number of weed species. The data allows us to confidently conclude that the addition of the PS2 inhibiting molecule in Imtrade Guerrilla® plus its enhanced surfactant package makes it a more effective choice than other paraquat formulations on the market. Imtrade Guerrilla® consistently outperforms its competitors and should be the obvious choice for non-selective, rapid knockdown and resistance management situations.
