GENERAL INSTRUCTIONS

Mixing

Pour Imtrade Metalaxyl 250 EC Fungicide directly into water in the spray tank and mix well. Beware of solvent vapours while handling the concentrate and working near an open spray tank.

FUNGICIDE RESISTANCE WARNING

GROUP 4 FUNGICIDE

Imtrade Metalaxyl 250 EC Fungicide is a member of the Phenylamide group of fungicides. For fungicide resistance management, Imtrade Metalaxyl 250 EC Fungicide is a Group 4 Fungicide. Some naturally occurring individual fungi resistant to Imtrade Metalaxyl 250 EC Fungicide and other Group 4 Fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if Imtrade Metalaxyl 250 EC Fungicide and other Group 4 Fungicides are used repeatedly. These resistant fungi will not be controlled by Imtrade Metalaxyl 250 EC Fungicide and other Group 4 Fungicides, thus resulting in a reduction in efficacy and possible yield loss.

Since the occurrence of resistant fungi is difficult to detect prior to use, Imtrade Australia Pty Ltd accepts no liability for any losses that may result from the failure of Imtrade Metalaxyl 250 EC Fungicide to control resistant fungi.
