Cracker Jack 550[®]

MODE OF ACTION

Imtrade CRACKER JACK 550[®] is classified as a Demethylation Inhibitor (DMI) Group 3 fungicide. The active ingredient acts on target pathogens by demethylation of C-14 during ergosterol biosynthesis. Ergosterol is a critical component of cell wall synthesis. By inhibiting the formation of cell walls, Imtrade CRACKER JACK 550[®] prevents the growth of the targeted fungal pathogen, preventing the development of further infection. Imtrade CRACKER JACK 550[®] is classified as an acropetal penetrant as it is upwardly translocated within the plant via xylem tissues in response to the transpiration pull. It also displays lateral diffusion from the upper leaves to the lower leaf surfaces at the point of contact prior to acropetal translocation.

USING IMTRADE CRACKER JACK

For maximum effectiveness, please use as directed and consider the following:

- **Read the Label:** Always read the label when considering Imtrade CRACKER JACK 550[®] for your broad-acre fungicidal protection strategy.
- **Watch the Weather:** Pre-emptive strategies could help you save your crop. Imtrade CRACKER JACK 550[®] can help to prevent fungal outbreaks when applied prior to fungal promoting weather.
- **Monitor the Crop:** Regular monitoring of susceptible crops is vital, best results are obtained when Imtrade CRACKER JACK 550[®] is applied at first signs of disease onset.
- **Use the Correct Water Rate:** Fungicides, including Imtrade CRACKER JACK 550[®], work best when applied at water rates that provide thorough coverage of the target. For best results and to prevent fungal resistance ensure water rate/nozzles being utilised are providing adequate coverage.
- **Imtrade CRACKER JACK 550[®]** is compatible with most commonly used insecticides and fungicides. Always conduct a jar test for physical compatibility. (Note this does not indicate chemical compatibility)
- **Caution** is advised when mixing CRACKER JACK 550[®] with foliar fertilisers. Leaf scorch can occur and foliar fertilisers can cause physical compatibility issues.

IMTRADE CRACKER JACK BENEFITS

When used as directed, Imtrade CRACKER JACK 550[®] provides effective control of certain fungal diseases of oats, barley, wheat and other crops. Imtrade CRACKER JACK 550[®] will also control Dollar spot in Bent and Queensland Blue Couch, and Spring Dead Spot in Couch.
