ACTIVIST[®]
900 VERIPHY[®] SP INSECTICIDE

New High-Loading Solvent-Free Formulation

- ▶ Extensive label
- ▶ Utilises VeripHy[®] pH indicator technology
- ▶ Enhanced safety profile

Activist[®] 900 VeripHy[®] SP Insecticide

- **Safe High-loading Formulation:** Activist[®] 900 VeripHy[®] SP Insecticide is the most concentrated Methomyl formulation in the market (900g/kg), reducing storage and transport costs, while providing a safer, lower-risk product in water-soluble bags.
- **Broadly Registered Use:** Treats a range of key pests, including caterpillars, moths, bugs, beetles, thrips, borers, flies, aphids, midges, loopers, leafhoppers and ants.
- **Improved Safety Profile:** Formulation removes flammable and toxic solvent methanol commonly found in other methomyl formulations.

VeripHy[®] Technology

The colouring displayed upon preparing the spray solution indicates whether chemical degradation of the active ingredient is a threat.

pH ≤ 7	pH > 7
If the spray solution (water + product) is yellow, this indicates that conditions are favourable (ie: neutral to acidic).	If the spray solution (water + product) is purple, this indicates that conditions are unfavourable (ie: alkaline), which requires a pH adjustment.

Use Imtrade Pro 700 or similar acidifying agents where pH adjustment is necessary.

Registered in the following crops:

- Adzuki Beans, Apples, Barley, Broad Beans, Blueberries, Brassicas, Centrosema Pascuorum, Chickpeas, Citrus, Cotton, Cowpeas, Duboisia, Ginger, Grapevines, Guar, Hops, Lentils, Linseed, Lucerne, Lupins, Mint, Mung beans, Nectarines, Oats, Pastures Native & Improved, Pasture Legume, Peaches, Peanuts, Pears, Peas, Pigeon Peas, Poppies, Potatoes, Rapeseed/Canola, Sesame Seed, Sorghum, Soybeans, Stonefruit, Strawberries, Sunflowers, Sweetcorn & Maize, Sweet Peppers, Tea Tree, Tobacco, Tomatoes, Wheat
